Retreat Experience

Yoga
 Visualizations
 Guided sessions
 Outdoor Activities
 Group Engagement
 Expressive Therapy

Retreat Design Model

Level II curriculum is a five day workshop for women (ages 19 - 29) who have suffered disfiguring traumatic injuries and have attended Level I in the past. The retreat covers a variety of learning experiences, discussions, and skill sets to improve resilience, acceptance, gratitude and leadership over their lives. The skills learned will enhance your ability for success in your personal, academic and work lives. Program design is delivered in an integrated curriculum that focuses on both the internal and external self. Participants will be able to apply the skills learned to their life, to mentor and help others in leadership roles for themselves and Angel Faces. All therapeutic programs and services are implemented by licensed professionals.
